## Interval Baseball Throwing Program

### *Phase 1 – Distance / Endurance*

#### **General Principles:**

This program is designed to help athletes re-introduce throwing to their rehab program. The program is designed to develop those specific qualities in the throwing motion. All throwing should be performed in the presence of a coach or qualified person to stress proper mechanics. This program should also be used in conjunction with the Throwing Athlete Exercise Program.

The athlete should ice the affected extremity for 20 minutes following all throwing activity. The athlete should only progress to the next Step of each Phase if he / she was able to complete the current Step without pain or difficulty. Under the direction of the therapist or Athletic Trainer, the athlete may progress through the Steps and Phases as tolerated. Emphasis should be placed on developing and maintaining proper throwing mechanics without developing symptoms.
